

**NAME**

`now` – display upcoming events

**SYNOPSIS**

`now` [ *options* ] file

**DESCRIPTION**

`now` lists events from a queue-format calendar, reformatting to ease reading. By default, events are reformatted to the terminal width, with one screenful of events shown.

**OPTIONS**

`-a, --all`

List all events instead of only a screenful.

`-e, --events=count`

List number of events specified.

`-p, --past`

Include events prior to today.

`-t, --today`

Show only today.

`-w, --width=columns`

Format for the specified width

**FILES**

`Documents/Cloud/queue.txt` is the default file.

**SEE ALSO**

`cloud(1)`, `queue2ics(1)`, `queue(5)`
