

NAME

now – display upcoming events

SYNOPSIS

now [*options*] matching-criteria ...

DESCRIPTION

now lists events from a queue-format calendar, reformatting to ease reading. By default, events are reformatted to the terminal width, with one screenful of events shown.

OPTIONS

-a, --all

List all events instead of only a screenful. This is the default if output is redirected or piped.

-c, --complete

Show only completed events.

-e, --events=*count*

List number of events specified.

-f, --file=*file*

Specify an alternate file. Repeat option to specify multiple files.

-i, --not-complete

Show incomplete events and those without completion status.

-I, --incomplete

Show only events marked incomplete.

-p, --past

Include events prior to today.

-P, --past-only

Show only events prior to today.

-t, --today

Show only today.

-u, --unformatted

Do not reformat events. Implies **-a**.

-w, --width=*columns*

Format for the specified width.

FILES

`Documents/Cloud/queue.txt` is the default file.
