

NAME

pass – Password lookup and editor

SYNOPSIS

pass [*options*] search terms ...

DESCRIPTION

pass looks up passwords in an encrypted text file, and allows editing that text file. Searches are case-blind. Although **pass** was written for password management, it can be repurposed for other files using the **-f** option and shell **alias** command.

OPTIONS

-f, --file=*file*

Specify the password file. Files are encrypted only if the the file extension is **.cpt**.

-e, --edit

Edit the file using the editor specified by the **VISUAL** or **EDITOR** environment variables, or **vi(1)** by default.

FILES

passwords.cpt

The default password file.

ENVIRONMENT

PASSFILE

Sets an alternate path for the password file. Overriden by **-f**.

SEE ALSO

cloud(1), **pn(1)**, **ccrypt(1)**.
