

# Out of work? Looking to change jobs? Look no further, *Resume Greppers* is here to help!

Using advance technology that our tech-nerds tell us is called "grep," we'll pair you up with a job doing technology you're already familiar with.

Just listen to these testimonials:

*"As I'm aging, I don't want to leave technology altogether, but I would like to spend more time with my grandchildren and family. Resume Greppers has been working diligently to find part-time employment, checking in with me every few months to make sure I'm alive. One of these days, I'm sure I'll have the gig I'm seeking."* - David G. Korn

*"After a lifetime of C++, I want something new, different—something fresh and inspiring. In just 6 weeks Resume Greppers landed me over 150 job offers. Admittedly, they were all for C++, but with the success of the C++ programming language I suppose that's inevitable. Still, there must be some opportunities in other languages, and given how hard they're working, I have no doubt Resume Greppers will find that needle in the haystack soon."* -- Bjarne Stroustrup

*"Resume Greppers got me an awesome job with my mad haxxing skillz! Resume Greppers rocks!!!!111"* - Biff
